### MACS Turnout Gear

- Turnout gear that's got your back.
- The increased cancer risk among firefighters is a major concern all over the world – and when you are out on a call, your turnout gear is often exposed to dangerous particles.
- Viking has developed and tested a tactical solution for the next generation of protection, with the new MACs gear, you remove the contaminated outer shell after putting out the fire, leaving the liner as a wearable and weather protective suit for the road home.
- Personalize your gear like never before!
- Inspired by the flexibility of modern combat gear, Viking MACs has a modular personalization system of webbed loops, allowing you to place pockets, pouches, or other accessories right where you want them.

## Harrington Hydrassist Valve

For boosting pressure on long hose lays or for boosting low hydrant pressures. The lightweight hydrant valve enables the

first-in pumper to lay LDH directly from the hydrant to the fire and when hose lay is completed, start flowing water from the hydrant. If additional pressure is required, another pumper can connect to the Hydrassist valve and start pumping to raise pressure and flow without interrupting the established water supply. The valve provides an emergency shutdown capability.

### Grain Auger

The auger stands out when on duty in rescue red. The Rescue Auger is to be used in grain bin/elevator rescue situations. If a person is trapped under grain, the Rescue Auger is used to auger out grain quicker than scooping to quickly free the trapped victim. The Rescue Auger should be used with a grain rescue tube. Once the tube is secure around the victim, the Rescue Auger can be placed in the tube and quickly expel the unwanted grain. The Rescue Auger is powered by any power drill. Weighing only 26 lbs, the Rescue Auger can expel grain at 1.5 bushels/minute. Easy to use with a variety of grain - corn, wheat, milo, soybeans - the Rescue Auger is a necessity for any, and every, rescue department.
