### PSS Dive

The PSS Dive is a combination of a carrying and buoyancy control device for professional diving use. It can be individually configured from various components, such as the Panorama Nova Dive full face mask and the Secor 7000 pneumatic system. The PSS Dive can be dove with single or double cylinders. The PSS Dive not only offers a high

level of wearing comfort, but is also characterised by extremely high resistance to challenging conditions. This is due to robust materials, such as the 1000 Denier Cordura, and the two-shell construction of the wing bladder. This has a buoyancy volume of 25 liters. Eight stainless steel D-rings are attached to various anchor points for attaching signal/rescue lines, for example. These are designed for rope pull forces of up to 450 lb.

Item #	Description	Price

### Containment Fill Stations

CFS5.5-3S

Our 5.5 series of containment SCBA/SCUBA fill stations were independently tested to the same rigorous standards and stringent test parameters dictated by NFPA 1901 that our CFSII series was, however in the testing of the 5.5 series Bauer utilized 110 cu. ft. 5500psi SCBA's in lieu of 88 cu. ft. 4500psi SCBA's.

- Complete with cylinder scuff guard, SCBA fill connection, fill hose, and bleed valve.
- Fill control panel.
- Mounting base.
- Bottom venting.
- Hands-free door interlock.
- Ergonomic loading height.

## Dräger

### Alcotest 5000 Alcohol Breath Device

The Dräger Alcotest® 5000 is a highly reliable breath-alcohol tester that detects the presence of alcohol. This high-speed breathalyzer lets you perform up to 12 tests per minute. Its special non-contact funnel reduces the back-flow of expired air to a minimum, preventing the risk of infection to subsequent test subjects. In addition to roadside checks, the Alcotest 5000 is ideal for large-scale operations, such as entrance checks at work sites, schools, stadiums, entry points to public transport, and airport security checks.
